This warranty applies to Smartstone Quartz surface or Smartstone Marble surface products ("Products").

## Our Promise

We promise to you that Smartstone Quartz and Smartstone Marble are of the utmost durability and practicality. In the unlikely event of a defect arising from the manufacture of the Products, in addition to your rights under the Australian Consumer Law, Smartstone will do its utmost to provide a fair and reasonable outcome to all customers covered by the Smartstone Warranty.

## Product Appearance, Care and Specifications

The Products are manufactured from natural materials. Each slab is unique and will contain variations in shading, reflectivity, and the distribution and appearance of quartz. These variations are naturally occurring characteristics of the material. The appearance of each slab will also vary depending upon lighting conditions, placement, and viewing angle.

The Products are manufactured to a thickness tolerance of +/-1.5mm, with bowing of not more than 2mm over the length or width of the product when properly installed and supported. The cleaning and care requirements of each Product will vary depending upon its type, colour and finish. Smartstone's care and maintenance guide is accessible on Smartstone's website – [www.smartstone.com.au](http://www.smartstone.com.au)

Surfaces in the Naturale Collection have a lower polish level which will require more daily maintenance than a polished surface. They are marginally more prone to marking from fingerprints, smudges and normal, everyday spills than other Smartstone surfaces, all of which are easily removed by following our Care & Maintenance instructions. For fabrication recommendation, please refer to the Smartstone Fabrication Guide.

Smartstone Marble surface contains up to 95% natural marble, and therefore exhibits similar qualities to natural marble with regard to porosity and scratch resistance. Smartstone Marble surface should not be used for food preparation areas (as the surface is porous) or other applications where staining or scratching of the surface may occur. Some Products contain pieces of seashell. These products are susceptible to staining and corrosion from acidic substances such as lemon juice. It is possible that, through normal wear and tear, a piece or pieces of seashell located close to the surface of the product may fall out. This is not a defect in the Product.
